

## International Federation of Hydrographic Societies Recommended Reading List

The journals, periodicals and e-newsletters listed below offer a wealth of useful information on hydrography and other related disciplines. It is not intended to be an exhaustive list but represents the publications regularly browsed by the membership of the IFHS-member societies.

Wherever possible we have tried to indicate publications which are produced by or on behalf of other similar membership organisations and professional bodies.

The list will be reviewed and updated from time to time. To request the inclusion of another title please contact [helen@hydrographicsociety.org](mailto:helen@hydrographicsociety.org)

Title	Language	Comments	Published by or on behalf of
IFHS News	English		International Federation of Hydrographic Societies
